NC2.0™

Expert North Carolina Criminal Solution

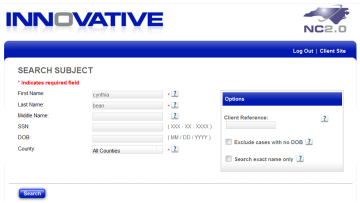
Details:

NC2.0™ is a cutting-edge North Carolina criminal record solution built on powerful heuristic "learning" technology that actually pursues new leads in real time as the search unfolds.

With NC2.0™, you control the cost of each search, with a predictable fee for each initial index search. Real-time verification direct from the North Carolina "Green Screen" is available at the click of a button for a nominal additional fee for each case you choose to verify.

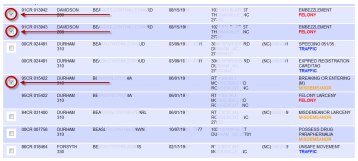
How it Works:

1



Enter your search criteria.

2



Review the index and choose which cases you want to include in your report.

3

View your detailed report.

To update your report with real-time case details, directly from the "Green Screen," click the Verify button.

Features and Benefits:

- Powerful heuristic "learning" technology actually **pursues new leads in real time** as the search unfolds, much like an investigative researcher would.
- You **control your search costs**. Pay a predictable fee for each initial index search and a nominal additional fee for only those cases that you choose to verify.
- Initial index search runs against the new ACIS Demographic Extract, the **most up-to-date** bulk data index compilation available, updated nightly direct from the North Carolina Administrative Office of the Courts.
- Each initial index result shows the defendant's demographic identifiers, such as **name and date of birth**, as well as the county and case number.
- For the millions of cases filed prior to December 31, 2010, the initial index result **includes historical case detail data** from our NCAOC archive database, such as **case type, charge and disposition**, enabling you to determine which cases you wish to pursue further for verification.
- **Built-in real-time verification**, direct from the North Carolina "Green Screen" is available at the click of a button for a nominal additional per-case charge, providing you with all of the resources necessary to produce a fully §613(a)(2) compliant report.
- As with all of our solutions, NC2.0™ is built and backed by industry experts who are only a phone call away.
