

NC2.0™

Expert North Carolina Criminal Solution

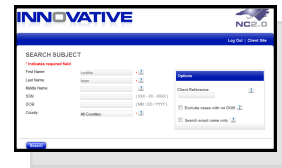

Flexible Options to Fit Your Business Model:

NC2.0™ is a cutting-edge North Carolina criminal record solution built on powerful heuristic “learning” technology that actually pursues new leads in real time as the search unfolds.

With **NC2.0™**, you control the cost of each search, with a predictable fee for each initial index search. Real-time verification direct from the North Carolina “Green Screen” is available at the click of a button for a nominal additional fee for each case you choose to verify.

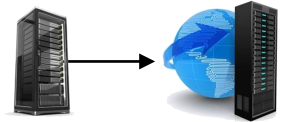

Or, upgrade to **NC2.0™ Pro** for a truly full-service solution, with automatic Green Screen case reverification built in at no additional cost to you.

Both Solutions Available Via:

NC2.0™ Web

ieXML™

NC2.0™

Includes:

Instant Results

Updated case index information is pulled nightly from the new NCAOC ‘demographic’ bulk data extract, capturing new case filings, updates and expungements.

Proprietary NC2.0™ Heuristic Matching Technology

Our sophisticated search technology helps you locate additional relevant cases, such as undocumented aliases, name misspellings and altered identifiers that other providers won’t find.

Includes Historical Case Details

We’ll provide defendant identifiers, county and case number for cases filed after January 1st, as provided by NCAOC. For the millions of cases already in our archive, we’ll provide enhanced case information, including grading, charge, disposition and sentencing, enabling you to decide which cases you need to pursue for further verification.

One-Click Real-Time Verification Options

With a single click, real-time case verification, direct from the NCAOC ‘Green Screen’ is available for a nominal additional fee per case you choose to verify.

NC2.0™ Pro

Includes:

100% Turn-Key Solution

Enjoy a truly turn-key solution via our web portal or XML. Found cases are automatically reverified, at no additional charge, against the NCAOC ‘Green Screen’ before being returned to you in a complete, ready-to-go report.

Enhanced Precision through Refined Matching Logic

Using strict name and DOB matching, **NC2.0™ Pro** delivers a highly-refined results set that greatly reduces false positives and back-end rework by your research team, increasing the probability that returned records belong to your subject.

* To maintain eligibility for **NC2.0™ Pro**, hit ratio must not exceed 15%.

Both Solutions Are

Built and backed by Industry Experts

Available as a Single County or Statewide Search

Offered via the web, XML and through select Software Provider Partners
